and J. Prištaš, H. Tkáčová (Slovak Republic).

Danube Region Vienna-Bratislava-Budapest

MAP OF GENETIC TYPES AND THICKNESS OF QUATERNARY SEDIMENTS

1 : 200 000

- Fluvial sediments (loams, sands and gravels) Holocene
- Fluvial sediments (gravels) Pleistocene
- Aeolian sediments (sands) Pleistocene-Holocene
- Aeolian sediments (loess) Pleistocene
- Paludal (swamp) sediments Holocene
- Limnic sediments (humic loams and clays) Holocene
- Deluvial (slope) deposits (loams) Pleistocene - Holocene
- Fluvio-proluvial deposits (gravels - loamy gravels) Pleistocene - Holocene
- Proluvial deposits (gravels - loamy gravels) Pleistocene
- Travertine Pleistocene - Holocene
- Replenishment - Recent
- Pre-Quaternary Formations (undivided)
- Thickness of Quaternary sediments

0 2 4 6 8 10 km

DANREG is a CENTRAL EUROPEAN INITIATIVE project and a joint scientific programme of: Geological Survey of Austria (Vienna) Geological Survey of Slovak Republic (Bratislava), GEOCOMPLEX Co. (Bratislava) - with special financial support of Ministry of the Environment of Slovak Republic Geological Institute of Hungary (Budapest), Elméleti Légió Geophysical Institute (Budapest)
