Global Geodetic Observing System

GGOS – 2017 until 2019

International Association of Geodesy (IAG)

Ruth Neilan

Vice Chair GGOS

NASA/Caletch/Jet Propulsion Laboratory, California USA

This talk will provide an update on the status of the Global Geodetic Observing System (GGOS) and plans for the next years, until 2020. A summary of relationships of GGOS to other relevant international organizations will be defined.

For this background, GGOS components work with the the International Association of Geodesy (IAG) and their IAG Scientific Services for integration of applications and their timely provision of data and products for geodesy and geoscience.
