Introduction to the Alpine Fieldtrip

(Ivo Baron)

A three-days lasting field trip to outstanding large slope failures in Austria will be guided by experienced Austrian specialists. The excursion sites represent prominent deep-seated slope failures of different mechanism, state of activity, social impact and perform great variety of slope-failure features and fabrics. Transportation on more than 1200 km long trip will be provided by a rental minibuses and the excursion will be held in any kind of weather. We will visit high alpine altitudes, thus field clothing, raincoats and boots are required.
