Marazion
Cornwall

13th Oct. 1873

My dear Hofrathe,

We are wishing that you were with us on the shores of our Western ocean where we held this week the meeting of our Cornwall Geology Society, a body of very good people but among whom alas! geology is a very scarce and lightly disseminated article. We have been intending over and over again to write and tell you how much we have enjoyed our recollection of early summer at Vienna, and

5th May 1873

My dear friend,

I have brought my wife and
sister-in-law, Miss Mackelone,
so far on a tour which takes us to
Przibram, and so I suppose, na-
turally to Wien. Are you there,
and shall you be there on the 15th
to the 18th when I hope to be in the
Kontstadt, if I can hear that it
is possible to get quarters. I shall

of your comfortable quarters, and the attentions of Johann; and have been desirous to know whether your particular portion of the exhibition was duly appreciated.

Do you recollect that we pointed out to you in "Italy" the small statue of the boy Michel Angelo, - as being so like our younger child. Will you tell us if that is yet sold. It was priced at ~~£~~ 2000 guilder, which is more than I should wish to give, but I sometimes think that if one had offered half the price to the artist

- he being an Italian - & therefore unused to prix fixe we might perhaps have agreed. If you are still going in and out of the Austrians I dare say you will not mind seeing if we have a chance of acquiring that particular specimen of marble.

By this time I suppose you will have your family re-established at Vienna. We hope all are well and my wife joins me in sending you best wishes and a reminder how pleased we should be if you can pay us a visit in London.

Yrs sincerely
Warrington Smyth
