

Anhang

Katalog der Typen und Abbildungsoriginale der Geologischen Bundesanstalt¹⁾

2. Teil: Wirbellose der Kreide (exklusive Mikrofossilien)

Von FRANZ STOJASPALE

Der vorliegende zweite Teil des Kataloges der in der Geol. B.-A. aufbewahrten Typen und Abbildungsoriginale umfaßt die kretazischen Evertebraten unter Ausschluß der Mikrofossilien. Umfang und Aufbau sind gegenüber dem ersten Teil¹⁾ gleich geblieben und bedürfen daher keiner weiteren Erläuterung. Nur die Bedeutung der verwendeten Abkürzungen soll nochmals kurz erklärt werden:

Htm = Holotypus monotypicus; Htd = Holotypus designatus; S = Syntypus; L := Lectotypus; N = Neotypus; P = Paratypoid; A = Abbildungsoriginal. Die nach einem S in Klammern gesetzten Zahlen bedeuten die abgebildeten (vor dem Schrägstrich) und nicht abgebildeten (nach dem Schrägstrich) Exemplare.

Im Gegensatz zum ersten Teil wurden hier die Namen der österreichischen Bundesländer bei der Angabe des Fundpunktes wie folgt abgekürzt:

Ktn = Kärnten, NO = Niederösterreich, OÖ = Oberösterreich, Sbg = Salzburg, Stmk = Steiermark, Vbg = Vorarlberg.

Der Kenntnisstand ist der vom März 1976.

Zu folgenden Arbeiten wurden vorhandene Originale in den Katalog aufgenommen:

BITTNER, A.: Über zwei neue Brachiopoden aus dem Lias und der Gosaukreide von Salzburg. — Jb. Geol. R.-A. 48 (1898), 1—8, 1 Taf. Wien 1899.

FAVRE, E.: Description des Mollusques fossiles de la Craie des Environs de Lemberg en Galicie. XII, 187 S., 13 Taf. Genève et Bale 1869.

FELIX, J.: Studien über die korallenführenden Schichten der oberen Kreideformation in den Alpen und in den Mediterrangebieten. I. Teil: Die Anthozoen der Gosauschichten in den Ostalpen. — Palaeontographica 49, 163—360, 67 Abb., 9 Taf. Stuttgart.

HAUER, F. v.: Über die Cephalopoden der Gosauschichten. — Beitr. Palaeontographie Österr. 1, 7—14, 3 Taf. Wien & Olmütz 1858.

HAUER, F. v.: Neue Cephalopoden aus den Gosaubilden der Alpen. — Sitz.-Ber. Math.-Naturwiss. Cl. Akad. Wiss. 53, I. Abth., 300—308, 2 Taf. Wien 1866.

HOUSA, H.: Los Apticos de Cuba. I. *Lamellaptychus angulocostatus* (PET.) — Acad. Cienc. Cuba, Inst. Geol. Paleont., Ser. Geol. 14, 1—57, 24 Abb., 10 Taf. La Habana 1974.

KOLLMANN, H. A.: Die Gattung *Trochactaeon* in der ostalpinen Oberkreide. Zur Phylogenie der Actaeonellidae. — Ann. Naturhist. Mus. Wien 71, 199—261, 7 Abb., 9 Taf. Wien 1967.

PETERS, K.: Aptychen im Neocomien und oberen Jura Oesterreichs. Jb. Geol. R.-A. 5, 439—444. Wien 1854.

¹⁾ Teil 1: Wirbellose des Kaenozoikums von F. STOJASPALE in: Verh. Geol. B.-A., 1975, Heft 1.

- PETRASCHEK, W.: Die Zone des *Actinocamax plenus* in der Kreide des östlichen Böhmen. — Jb. Geol. R.-A. 55, 399—434, 8 Abb., 1 Taf. Wien 1905.
- PETRASCHEK, W.: Über Inoceramen aus der Gosau und dem Flysch der Nordalpen. — Jb. Geol. R.-A. 56, 155—168, 4 Abb., 1 Taf. Wien 1906.
