It has been brought to our attention in the corresponding list of References, that the article numbers of the cited papers of Varotsos et al. (2003a, b, 2006b) are missing. The complete references are given below.

In addition, we note that the same thermodynamical model employed in this article by Dologlou has been subsequently found by Dologlou (2012) to lead to a satisfactory calculation of self-diffusion coefficients in alkaline earth oxides by means of the Anderson–Gruneisen parameter.
